

Files Log

Description

The Files Log application records all file access events within SaltOS4. It tracks when files are viewed, downloaded, or otherwise accessed by users, including associated metadata. This module provides a complete audit trail for document activity, supporting traceability and data governance policies.

List view

The following fields are displayed in the list view:

- Name: Name of the accessed or managed file within the system.
- Type: File format or classification (e.g., PDF, image, text).
- Size: Size of the file in bytes.

View entry

This view shows detailed information about a file access event.

It includes:

- Name: Name of the accessed or managed file within the system.
- Type: File format or classification (e.g., PDF, image, text).
- Size: Size of the file in bytes.
- Data: Internal content, metadata or serialized structure representing the file access or action.

Delete

Files log entries are usually not deleted manually.

They are retained for accountability and security monitoring, and may be purged automatically based on system settings.
