Close

It includes:

- Active: Indicates whether the token is currently valid and usable.
- User: User associated with the token.
- Created: Date and time when the token was created.
- Updated: Date and time of the last update to the token's state.
- Remote Address: IP address from which the token was used or created.
- User Agent: Browser or client used when the token was generated or accessed.
- Token: The token string used for authentication or access.
- Expires: Expiration date and time of the token, after which it is no longer valid.

Delete

Token log entries are not meant to be deleted manually.

They form part of the system's audit and access control history, and are subject to automatic cleanup if configured.
