

Product Types

Description

The Product Types application is used to classify products and services based on their nature or behavior. This classification helps distinguish between physical goods, services, subscriptions, or other internal categories used for reporting or automation.

Examples of types include "Product", "Service", "Subscription", or "Bundle".

List view

Name	Description	Active
Other	Unclassified category	✓
Consumables	Items that are used and replaced	✓
Accessories	Complementary items	✓
Cloud	Hosted online services	✓

The form includes the following fields:

- Name: Name shown in the type selection when creating a product.
- Description: Notes about the type's intended use.
- Active: Controls availability in product forms.

Delete

Types can be deleted only if they are not linked to any product.

Otherwise, deactivation is the recommended action.
