

## Files Log

### Description

The Files Log application records all file access events within SaltOS4. It tracks when files are viewed, downloaded, or otherwise accessed by users, including associated metadata. This module provides a complete audit trail for document activity, supporting traceability and data governance policies.

### List view

The following fields are displayed in the list view:

- Name: Name of the accessed or managed file within the system.
- Type: File format or classification (e.g., PDF, image, text).
- Size: Size of the file in bytes.

### View entry

This view shows detailed information about a file access event.

It includes:

- Name: Name of the accessed or managed file within the system.
- Type: File format or classification (e.g., PDF, image, text).
- Size: Size of the file in bytes.
- Data: Internal content, metadata or serialized structure representing the file access or action.

## Delete

Files log entries are usually not deleted manually.

They are retained for accountability and security monitoring, and may be purged automatically based on system settings.
