

Quotes Status

Description

The Quotes Status application is used to define the different states that a sales quote can have during its lifecycle. These statuses help sales teams track progress, filter records, and identify which quotes are active, accepted, rejected, or archived.

Examples of common statuses include "Draft", "Sent", "Accepted", and "Declined".

List view

The screenshot shows the SaltOS web application interface. At the top is a blue header with the SaltOS logo, navigation links for 'Dashboard' and 'Applications', and a user profile 'Admin'. Below the header is a search bar with a 'Search' button and a 'Reset' button. The main content area displays a table of quote statuses. The table has three columns: 'Name', 'Description', and 'Active'. It lists 12 statuses, each with a green checkmark in the 'Active' column and icons for search, edit, and delete. At the bottom of the table, it says 'Total: 10' and there is a '+ Load more' button. To the right of the table is a large blue square containing a white stylized logo of a person with arms raised.

The following fields are displayed in the list view:

- Name: Label of the status (e.g., Draft, Accepted).
- Description: Explanation of when this status is applied.
- Active: Indicates whether the status is selectable in the Quotes module.

Form view

This view is used to create, view or edit quote status entries.

In **create** mode, the form is empty and allows you to build a new quote.

The form includes the following fields:

- Active: Toggles the visibility of this status in dropdowns.
- Name: Name of the status as it appears in the interface.
- Description: Optional explanation for internal reference.

Delete

Quote statuses can be deleted only if they are not currently in use.

Deactivation is preferred to preserve consistency in historical records.
