# Upload Log

Description

The Upload Log application registers all file uploads made through SaltOS4, whether manual or automated. It helps track the origin, user, and context of each uploaded file, and is useful for auditing, debugging, and verifying that uploads are being processed correctly.

List view

The following fields are displayed in the list view:

- User: User who uploaded the file.
- Datetime: Timestamp when the file was uploaded to the system.
- App: Module or application from which the upload was triggered.
- Name: Original filename as provided by the user.

View entry

This view shows full details of a single uploaded file log entry.

It includes:

- User: User who uploaded the file.
- Datetime: Timestamp when the file was uploaded to the system.
- Uniq ID: Unique identifier internally assigned to the upload entry.
- App: Module or application from which the upload was triggered.

- Name: Original filename as provided by the user.

- Size: Size of the uploaded file in bytes.

- Type: MIME type or format of the uploaded file.

- File: Stored filename used by the system to manage the file internally.

- Hash: Checksum (e.g., MD5 or SHA) to verify file integrity or detect duplicates.

Delete

Upload log entries are normally preserved for historical traceability.

If needed, old entries may be deleted manually or through automatic maintenance routines.
