# Supplier Types

Description

The Supplier Types application is used to classify suppliers by category, industry, or relationship. This classification helps filter and organize suppliers, and may be used for segmentation or reporting purposes.

Examples of types include "Distributor", "Manufacturer", "Service Provider", etc.

List view

The following fields are displayed in the list view:

- Name: Name of the supplier type.
- Description: Optional clarification or internal note.
- Active: Indicates whether the type can be assigned to suppliers.

Form view

This view is used to create, view or edit supplier type entries.

In **create** mode, a new tax rule can be defined.
