Products

Description

The Products application manages the catalog of goods and services offered by the organization. It stores essential details like reference code, price, stock levels, tax rates, and classification. Products can be linked to quotes, invoices, and purchases, making this module fundamental to sales and inventory workflows.

List view

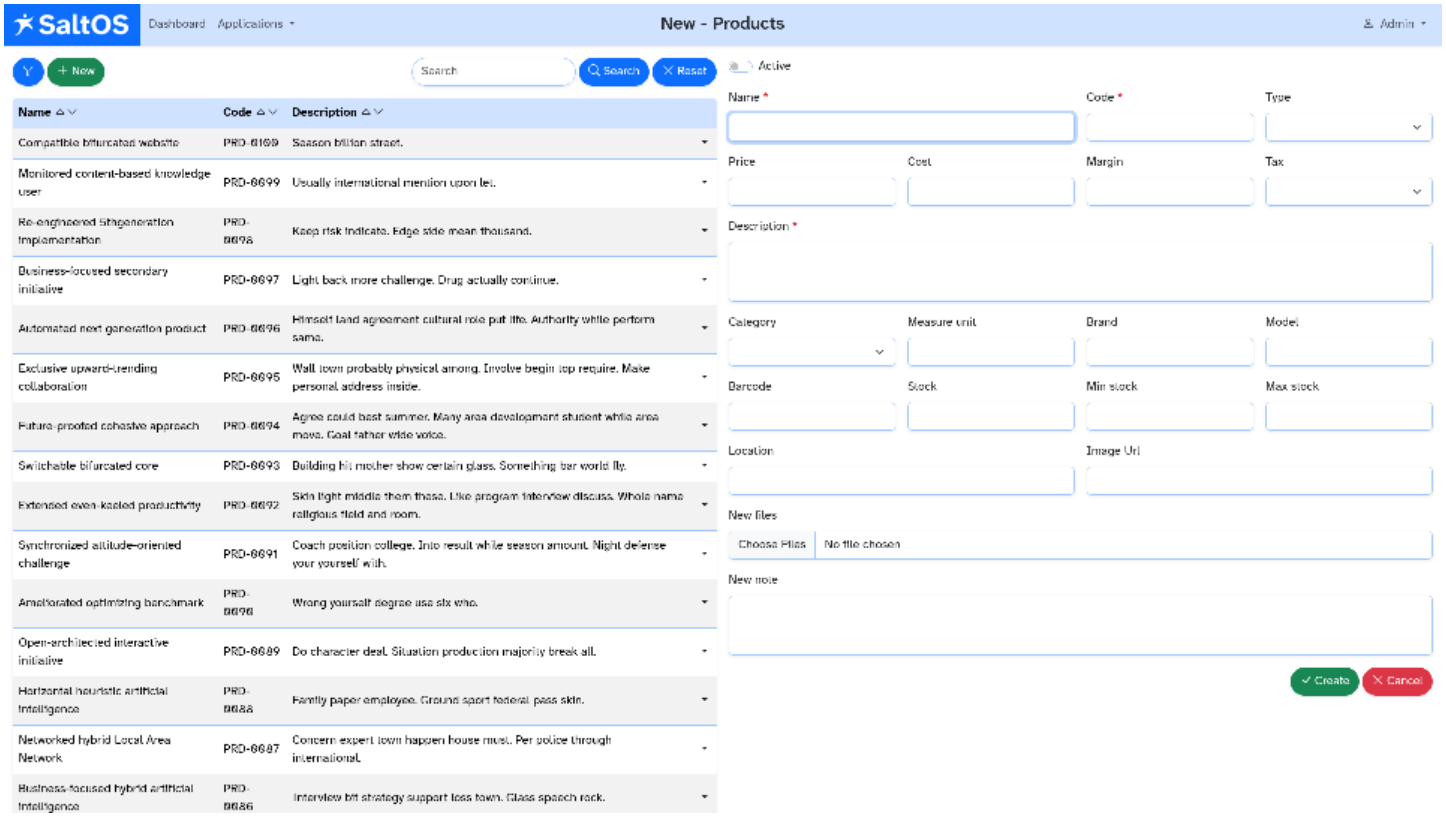

The following fields are displayed in the list view:

- Name: The full name of the product or service, as it will appear in listings and documents.
- Code: Internal product code used to uniquely identify the item.
- Description: Detailed explanation or specifications of the product.

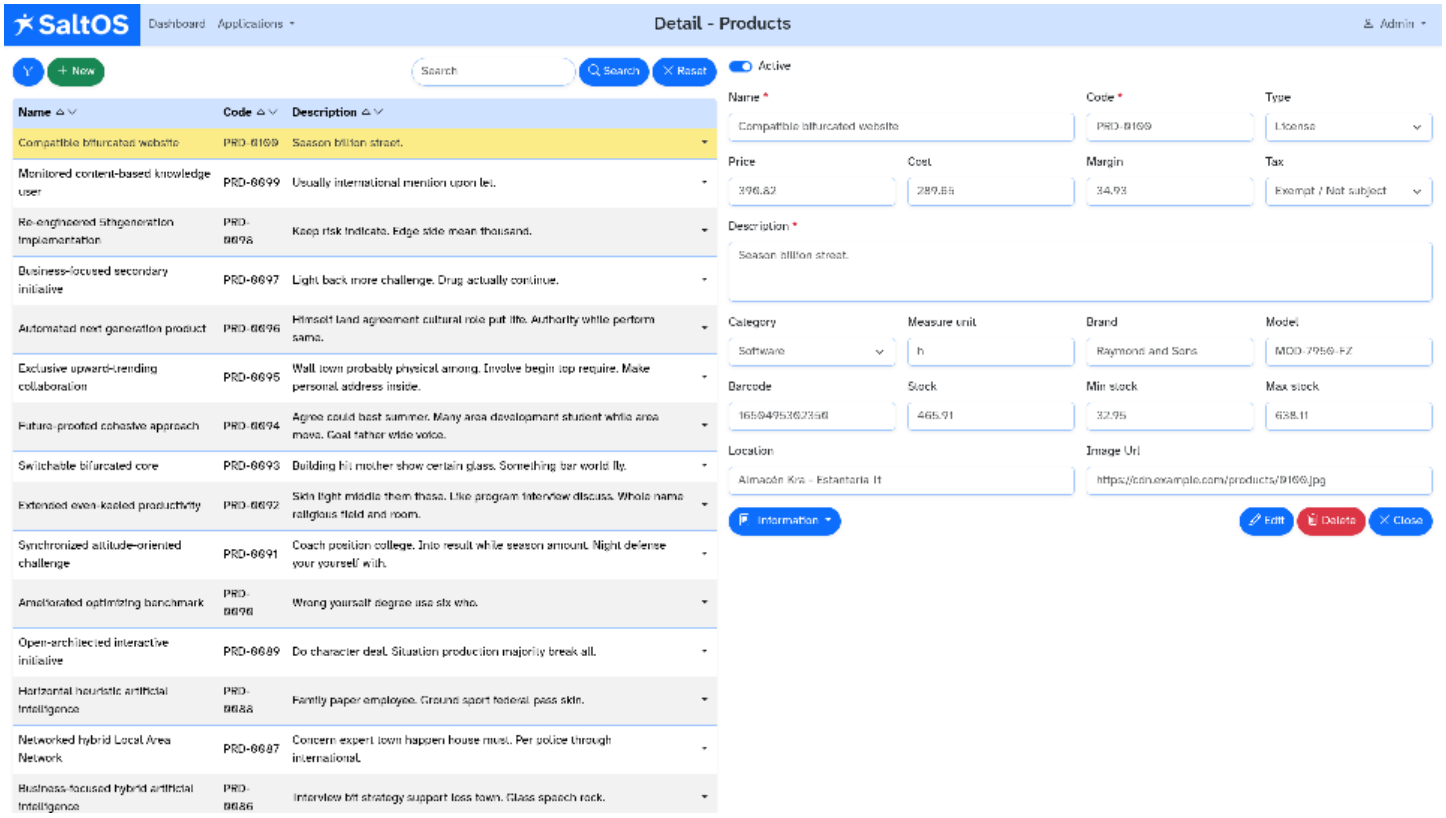

Form view

This view is used for creating, editing or viewing a product entry.

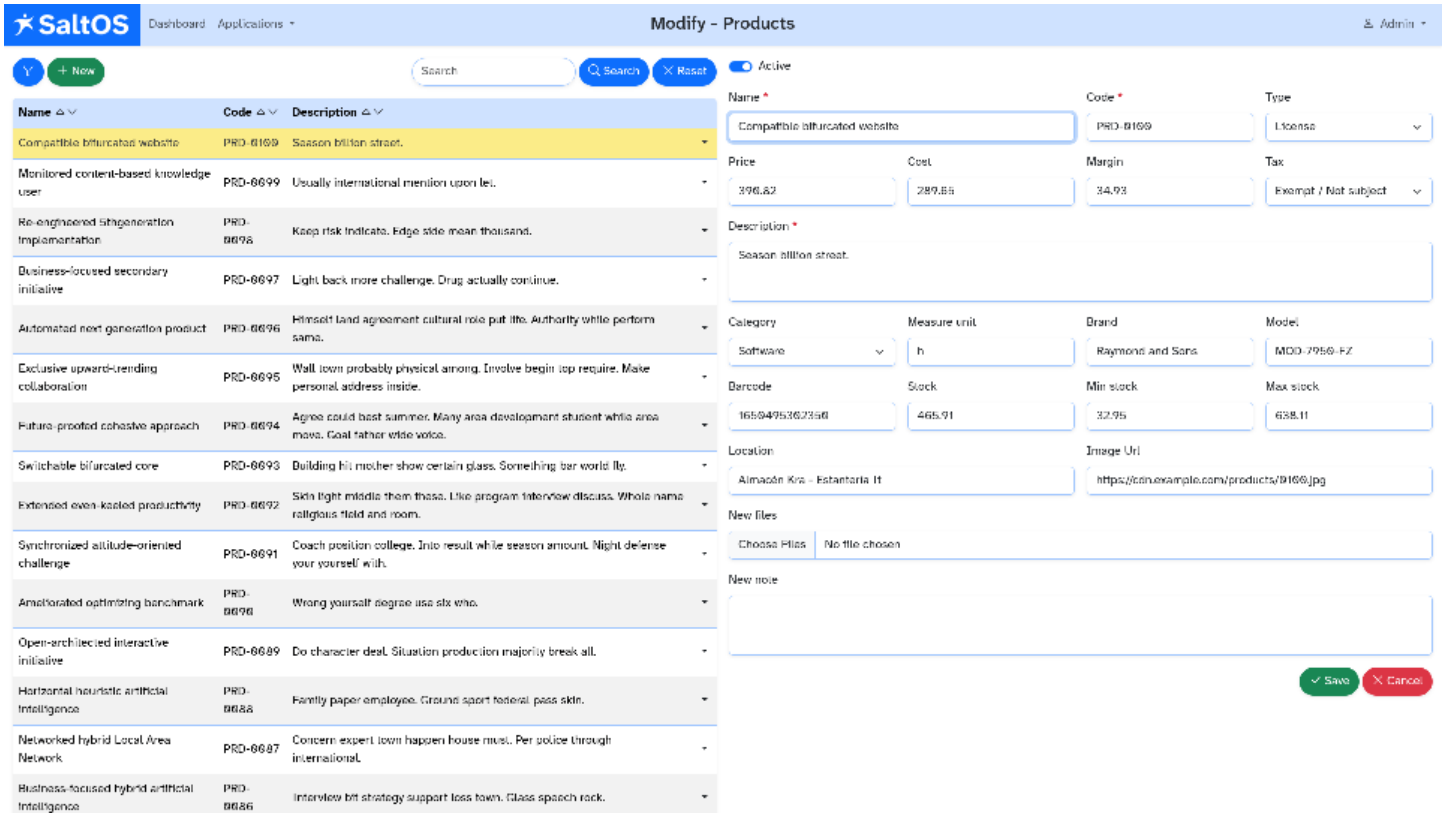

In **create** mode, the form is empty for entering a new product.

In **view** mode, all fields are read-only and show detailed information.

In **edit** mode, the product data can be updated or corrected.

The form includes the following fields:

- Active: Indicates whether the product is available for use in transactions.
- Name: The full name of the product or service, as it will appear in listings and documents.
- Code: Internal product code used to uniquely identify the item.
- Type: The classification of the product, such as item, service, or subscription.
- Price: The selling price per unit, excluding taxes or discounts.
- Cost: The internal purchase or manufacturing cost, used to calculate margins.
- Margin: Calculated profit margin based on price and cost.
- Tax: Default tax rate applied when the product is used in sales.
- Withholding: Default withholding applied when the product is used in sales.
- Description: Detailed explanation or specifications of the product.
- Category: Product family or group, used for classification or filtering.
- Measure unit: Unit of measurement (e.g., unit, kg, hour).
- Brand: Brand name or manufacturer of the product.
- Model: Model number or variant of the product.
- Barcode: Barcode associated with the product, used for scanning or labeling.
- Stock: Current stock level available in the inventory.
- Min stock: Minimum stock threshold for restocking alerts.
- Max stock: Maximum stock level allowed in storage.
- Location: Physical or logical storage location of the product.
- Image Url: Link or path to an image representing the product.

Delete

Products can be deleted from the list view if they are not referenced in active documents. A confirmation prompt will appear before deletion.

Products linked to invoices, quotes or purchases are protected from deletion.
