

Invoices

Description

The Invoices application is used to issue and manage customer billing records. Each invoice contains product or service lines, quantities, unit prices, taxes, and discounts. This module supports both pro forma and finalized invoices, tracks payment status, and integrates with the Customers, Products, and Taxes modules. It also provides traceability for due dates, payment dates, and links to related documents.

From the individual view of a record (view), the user can generate and download a PDF containing all relevant data of that entry.

From the list view (list), it is possible to select multiple records using the checkboxes and generate a single PDF that includes all of them.

Widgets on the dashboard

The invoicing application ('invoices') publishes several widgets on the main dashboard to provide a real-time overview of the system's billing status.

The available widgets are:

- **Table 'last_n_invoices':** shows the latest recent invoices, including key information such as customer, total amount, and payment status.
- **Chart 'invoice_total_by_day':** displays the total amount invoiced per day, highlighting peaks and activity trends.
- **Chart 'invoice_avg_by_day':** shows the average daily invoice amount, useful for evaluating consistency or seasonality.
- **Chart 'top5_customers_by_total':** highlights the top 5 customers by billing volume, helping identify key accounts.
- **Chart 'invoice_paid_vs_pending':** compares the number of paid vs. pending invoices, giving insight into payment flow.
- **Chart 'invoice_avg_days_to_pay':** shows the average number of days customers take to pay their invoices, helping assess payment behavior.

These widgets offer useful visual insights for decision-making and allow continuous monitoring of the business's financial evolution.
