

Taxes

Description

The Taxes application is used to define and manage tax rates applied to products, quotes, and invoices. It serves as a central repository of tax types such as VAT, sales tax, or exemptions. Each record includes the name, rate, and status, ensuring consistent tax application across the entire ERP system.

The screenshot shows the 'SaltOS' application interface for 'Modify - Taxes'. At the top, there's a navigation bar with 'Dashboard' and 'Applications' menus, and an 'Admin' user profile. Below the navigation bar, there's a search bar and buttons for '+ New', 'Search', and 'Reset'. The main content area is divided into two sections. On the left, a table lists existing taxes with columns for Name, Description, Value, Active status, and Default status. On the right, a form allows editing a selected tax, with fields for Name, Value, Description, New files, and New note. The 'VAT 21%' tax is selected in the table and the form.
