

Payment Methods

Description

The Payment Methods application is used to define and manage the types of payments accepted by the organization. These methods are later used in invoices to indicate how the customer will pay (e.g., bank transfer, credit card, cash). This module ensures consistency and traceability across the billing process.

Name

Prepaid

Description

Payment made using prepaid balance or voucher.

Information

EditDeleteClose

In **edit** mode, the details can be modified.

The form includes the following fields:

- **Active:** Indicates whether this payment method is currently available.
- **Default:** Specifies if this is the default payment method when creating new records.
- **Name:** Name of the payment method (e.g., Cash, Bank Transfer, Credit Card).
- **Description:** Additional details or clarification about how the payment method is used.

Delete

Payment methods can be deleted if not used in invoices.

If already referenced, they should be marked as inactive instead of deleted.
