

Product Categories

Description

The Product Categories application is used to group products into families or collections for easier classification. Categories are helpful for filtering, reporting, organizing catalogs, and applying common business rules.

Typical categories might include "Hardware", "Software", "Services", or "Accessories".

List view

The following fields are displayed in the list view:

- Name: Name of the category.
- Description: Description of what products the category includes.
- Active: Indicates whether this category can be assigned to products.

Form view

This view is used to create, view or edit product category records.

In **create** mode, a new tax rule can be defined.

The form includes the following fields:

- Active: Enables or disables the category for selection.
- Name: Label of the category as shown in the product form.
- Description: Optional clarification or notes about this category.

Delete

Categories can only be deleted if they are not assigned to any product.

When in use, they should be disabled instead.
