Taxes

Description

The Taxes application is used to define and manage tax rates applied to products, quotes, and invoices. It serves as a central repository of tax types such as VAT, sales tax, or exemptions. Each record includes the name, rate, and status, ensuring consistent tax application across the entire ERP system.

List view

./../../../../ujest/snaps/test-screenshots-js-screenshots-sales-taxes-list-en-us-light-1-snap.png

The following fields are displayed in the list view:

- Name: Name or label used to identify the tax (e.g., VAT 21%).
- Description: Optional explanation or additional details about the tax rule or context of use.
- Type: Indicates whether the register is a tax, that is added to the total (e.g., VAT), or a withholding, that is subtracted from the total (e.g., income tax withholding).
- Value: Percentage value of the tax to be applied (e.g., 21 for 21%).
- Active: Indicates whether this tax is available for selection in documents.
- Default: Indicates whether this tax is selected automatically when creating new documents.

Form view

This view is used to create, view or edit tax entries.

In **create** mode, a new tax rule can be defined.

The form includes the following fields:

- Active: Indicates whether this tax is available for selection in documents.
- Default: Indicates whether this tax is selected automatically when creating new documents.
- Name: Name or label used to identify the tax (e.g., VAT 21%).
- Type: Indicates whether the register is a tax, that is added to the total (e.g., VAT), or a withholding, that is subtracted from the total (e.g., income tax withholding).
- Value: Percentage value of the tax to be applied (e.g., 21 for 21%).
- Description: Optional explanation or additional details about the tax rule or context of use.

Delete

Taxes can only be deleted if they are not used in any invoice or product.

If a tax is in use, it must be deactivated instead to preserve system integrity.
